TO THE READER

This book makes three assumptions. The first is that you have just acquired a guitar and are ready for the pleasure and challenge of beginning to play. The second is that you know absolutely nothing about music or how it is written. The third is that you know nothing about the guitar itself.

Obviously if you *do* know something already you have an advantage, and this will help you through the early stages: But even so it will be a good idea to go carefully through the checklists provided to be absolutely sure that you have not missed some fundamental point.

For best results with this method, the secret is to go one step at a time, not trying to do too much at one sitting, and particularly not trying to jump ahead to the more difficult material.

Progression by simple stages is the key to major achievement. There is a saying in the East that a journey of a thousand miles begins with a single step; and the designers of do-it-yourself kits, from ham radios to harpsichords, have found that a person of average ability can construct amazingly complex finished items by following a clear progression of instructions. However, just as the omission of one part from an electronic kit can mean disaster, so in learning music the skipping of steps can mean failure to form the groundwork on which future progress depends.

This book is a practical manual; so as information is given, there is an action required to reinforce the memory. If the action involves saying something out loud, for instance when counting, do it without feeling foolish. As with names, verbal repetition is a strong aid to memorization.

If you possibly can, go to a teacher. Many of the musical exercises are designed for the teacher to play with the student, and they sound fuller and more interesting played this way. Also, your overall progress will be speeded up by the help that a good teacher can give you. But if access to a teacher is impossible, you can still achieve wonders if you remember that you must be the teacher as well as the student and impose on yourself a systematic and self-critical approach.

The main purpose is enjoyment. With the right start you can look forward to many years of pleasure and satisfaction. Learning to read music is not nearly as difficult as most people think, and with the correct approach it is well within the capabilities of the average seven year old child. The music symbols are not academic dogma; they are a tool for you to use to achieve your goals. You are the master, and they represent the servant that assists you on your musical journey.

The physical movements involved in playing music are known as "technique." Some beginning books leave this to the teacher and concentrate on musical notation only. This book attempts to give you the clearest possible explanation of how to perform the important basic movements in case a teacher is not available. Habits must be formed for the movements to become automatic, and it is as easy to form good habits as bad ones. But bad habits are hard to lose, so particular care in the first stages will save much time in the future.

Good luck, and welcome to the world of the guitar.

NOTE TO THE TEACHER

As far as possible I have tried to make this first approach to the guitar an enjoyable experience for both student and teacher. The exercises are in the form of duets, so that even the most basic process of note-learning can be fun. This usually comes as a surprise to the student who does not expect to be participating in "real music" at such an early stage, and his delight in his achievement serves as an incentive to both parties.

The scope of Part One has been carefully defined to include a fully illustrated description of all major techniques, the complete notes of the first position including accidentals, and the fundamentals of music up to the eighth note. The more advanced subjects, such as the dotted quarter note, theory of keys and scales, and notes faster than the eighth note, have been reserved for Part Two. Part Three completes the basic knowledge appropriate to the first year of study.

ABOUT THE GUITAR

This book is about the nylon-strung guitar of the type shown in the illustration. It is known variously as the classical (or classic) guitar, the concert guitar, or the finger-style guitar to distinguish it from other types with steel strings which are sometimes amplified electrically.

The classical guitar needs no amplification since of all the types it has the greatest natural resonance, and when professionally played can be clearly heard in a full-sized auditorium.

The same musical notation is shared by all forms of the instrument, but electric guitars are usually played with a plectrum of plastic or tortoise shell whereas the nylon-strung guitar is played with the fingers (or fingernails as we shall shortly see).

NAMING THE PARTS

For future reference it is important to know the correct name for the various parts of the guitar. After studying the diagram (Fig. 1), identify each of the following on your own instrument.

Fig. 1 THE ANATOMY OF THE CLASSICAL GUITAR.

Of particular importance is the numbering of the strings. Remember that the first string is the thinnest, highest in pitch, and closest to the floor when you are sitting in the normal playing position.

HOW GUITAR MUSIC IS WRITTEN

The following section explains all the musical symbols used in this book. The purpose is to give you an overall picture and a general section for reference; however, each item is introduced and practiced in the lessons which follow so as to build up the real familiarity that comes with use.

Music for the guitar is written on what is known as a STAFF, consisting of five horizontal lines. Each line and each space between represents a musical sound, lower sounds at the bottom of the staff and higher at the top.

At the beginning of each staff is a CLEF sign. The sign illustrated is always used for the guitar, and is known as a TREBLE or G CLEF (since it curls around the line that represents the note G). Other instruments of higher or lower pitch use different clefs, which indicate the set of notes more commonly used by that instrument.

The notes represented by the treble clef are as follows:

For memorization purposes they are usually divided into two sets:

Obviously the nine lines and spaces are not enough for all the notes, so extra lines are drawn above and below the staff where necessary

The extra lines are known as ledger lines. Notice that only the letters A to G are used for naming notes; after G the progression starts again with another A. You will soon find out in practice the similarity between one A and the next one eight notes (an OCTAVE) higher or lower. Your ear will tell you that although one is higher in pitch than the other they have a similarity in sound.

Now here are the six strings of the guitar expressed in notation.

NOTES AND RESTS

The symbols drawn on a line or space indicate how long each note is to last. Periods of silence are known as RESTS, and each note has an equivalent rest sign. Measurement is by even counts, also known as beats from the expression "beating time," which is what a conductor does with his baton.

The table below shows the note lengths in beats when each beat lasts a quarter note (the commonest time you will encounter).

SYMBOL	NAME	EQUIVALENT REST	DURATION
	Whole Note (Semibreve)		Four Beats
	Dotted Half Note (Dotted Minim)		Three Beats
	Half Note (Minim)		Two Beats
	Quarter Note (Crochet)		One Beat
	Eighth Note (Quaver)		Half a Beat

The names given are those used in the United States. The names in brackets are those in common usage in England.

A dot increases any note by half its value again. Hence a dotted quarter note lasts one and a half beats, as discussed later.

Two or more eighth notes may be joined together thus: 

The line joining them is known as a BEAM. The thin upright line is a STEM.

To assist counting and rhythm music is divided into BARS or MEASURES of a given number of counts. Bar lines are drawn vertically as shown below. At the beginning of every piece a TIME SIGNATURE shows how many beats there are in each bar, and also how long each beat lasts. The *upper* number tells you how many beats are in each bar, the *lower* number the duration of each beat.

Much of the above may seem difficult to grasp in theory, but it will become clear as you start to play from the music. It is necessary to list this rather large number of theoretical points because even the first and easiest piece of music must contain a staff, clef sign, time signature, etc. However, a basic concept will do at this point if you remember that this section is here for reference.

Now here is a checklist to see how many of the points you already remember.

1. Which letters are used for musical notes?
2. Which notes are represented by the lines of the staff? Which by the spaces?
3. How many beats does a half note last? A dotted half note?
4. Why are clef signs used?
5. What is a time signature? Which number indicates how many beats there are in a bar?
6. What are bar lines? Why are they used?

TUNING

Fig. 2 ATTACHING THE STRINGS TO THE BRIDGE.

Fig. 3 ATTACHING THE STRINGS TO THE TUNING KEYS.

With the strings correctly tied as shown above, the easiest way to tune in the early stages is to align the strings with the same notes on a piano. The diagram shows which notes to use.

Fig. 4 THE RELATIONSHIP OF GUITAR TUNING TO NOTES ON THE PIANO.

The tuning keys are used to tighten or loosen each string until it sounds the same as the given note on the piano. At first it is hard to hear if two notes are *exactly* in tune, but this comes with practice.

Begin by tuning the strings as closely as possible to the piano, then check them off in the steps given below.

1. Play the 6th string with a left hand finger behind the 5th fret. The note should be the same as the 5th string played open (i.e. with no left hand finger on it). If it is not the same, adjust the 5th string (*not* the 6th).
2. Now play the 5th string at the 5th fret. It should be the same as the 4th string open. If not, adjust the 4th string.
3. Follow the same steps, playing the 4th string at the 5th fret to obtain the sound for the 3rd string open. Adjust the 3rd string if necessary.
4. Now there is a slight change in procedure. The 3rd string must be played at the 4th fret (not the 5th) to give the same sound as the 2nd string. Adjust the 2nd string if necessary.
5. Finally play the 2nd string at the 5th fret to obtain the sound for the 1st string.

The above procedure is known as *relative* tuning, each string being tuned in relation to its neighbor. When the relationships are understood and have been practiced a few times, it only becomes necessary to have the pitch for one string, since the others can be tuned to it.

If a piano is not available, all music stores can provide either a pitch pipe or tuning fork to help you establish a correct pitch.

Of the two, the pitch pipe is easier to handle since it can be sounded while held in the mouth thereby leaving both hands free to play and adjust the tuning. A vibrating tuning fork must be held with the handle touching a resonant surface to be properly heard, and this ties up one of the hands. However, the tuning fork has the advantage of greater accuracy.

SPECIAL TUNING TIPS

1. A very small turn of the tuning key may not be sufficient to change the pitch of the string, due to play in the mechanism. A reasonably positive movement must be made.
2. If a string is minutely high in pitch, it may be brought down the necessary fraction by stretching it with the right hand. This is done by taking hold of the string and giving it a twist as if turning a handle.
3. The stretching procedure described above is particularly useful in taking the slack out of new strings. Otherwise new strings have to be constantly tuned since they keep going down when played. Beginners often think that this is because the strings are slipping, but if they are correctly tied as shown in the diagrams no slippage will occur.

If you still have problems after working through the above steps, do not hesitate to seek the help of a musical friend or a music shop. The staff at any shop where guitars are sold is accustomed to helping beginners, and a live demonstration can be most helpful. Now, as a quick check before continuing, answer the following questions.

1. What is an open string?
2. What is relative tuning?
3. Which string must be sounded at the 4th fret to give the pitch for its neighbor above?
4. How may a string be lowered in pitch without using the tuning key?
5. Why do new strings need to be stretched?

BEGINNING TO PLAY

Fig. 5 THE PLAYING POSITION

THE PLAYING POSITION

Study the diagram, and try to take a position as close to it as possible. The following points are important.

1. Sit on the *front* of the chair. The position involves leaning forward slightly, which is more difficult if you sit back in the chair.
2. Be sure to use a footstool or something similar to raise your left leg. This is the main support point for the guitar.
3. Take the weight of your right forearm on the guitar. Don't curl the arm around the guitar, since this will throw the right hand into the wrong position.
4. When you need to look at the front of the guitar, move your head forward rather than tilting the guitar back to you. This way you maintain control and domination of the instrument.

THE RIGHT HAND

Now look at the right hand in the diagram. Notice that the knuckles are aligned with the strings. If you can remember this one point, you will be well on the way to establishing a good right hand position. The wrist should be arched up from the face of the guitar, and should *never* touch it.

THE REST STROKE

Fig. 6 THE REST-STROKE.

B. The detail shows the nail in relation to the string

A. Preparation: Notice the angle of the finger.

C. Completion: The finger comes to rest on the adjacent string.

D. For the strongest sound the nail pulls directly across to the adjacent string.

E. For better tone quality the nail travels in the direction shown.

Preparation

Place the tip of the index finger on the first string, so that the fingertip is in contact with it, with the nail projecting over the string. The left-hand edge of the nail (as you look down on your hand) is in contact with the string.

Completion

Draw the finger towards the second string. Your nail first pulls against the original string, then releases it to play the note. The fingertip comes to *rest* on the second string, giving the movement its name; THE REST STROKE.

TONE QUALITY

Anyone can play a *loud* note, but the object is to make a beautiful one. The movement that produces the best tone is quite subtle, although easy to perform when clearly understood. It is described in considerable detail because it is the single most important secret in the development of your individual touch, and is unfortunately ignored or inadequately described in most beginning books.

First consider the following analogy. Imagine that the string is a rope stretched in front of you a foot or so above the ground, and that you are going to make it vibrate by using a spade whose tip is curved in a half-moon shape (representing your nail).

The simplest way to make the rope vibrate would be to put the tip of the spade on the far side of the rope and pull it towards you. The rope would slide down to the extreme tip as you pulled, then would slip clear and be free to vibrate. This represents a note played with a head-on attack, which would produce good volume but a somewhat harsh tone.

For a more pleasing sound let us return to the rope and the spade. First, the handle of the spade would be angled to the left so that it was about 15 degrees away from the vertical (or at ten o'clock if that is easier to imagine). Next, the blade of the spade would be placed on the far side of the rope with the left cutting edge only in contact with it, at a point on the spade where the half-moon taper begins. The right edge would be just clear of the rope, so that the whole blade forms a slight angle away from it.

To produce the subtler vibration, you would draw the spade towards you angling it slightly to your right so that the rope would slide down the left hand cutting edge, be caught by the tip, and finally released. The amount of obstruction offered by the tip could be precisely controlled by the angle of the blade as the movement was performed; the flatter the blade to the rope, the more obstruction.

This essentially is the movement made by the nail when it plays a note, and the main secret of good guitar sound is contained in this basic movement.

Two final important points: First, the movement is made by the finger alone, and does not involve the whole hand. Second, the finger should have a comfortable curve, and this curve should be maintained throughout the stroke. Resist any tendency of the joints to straighten out when pull is applied to the string. In our analogy this would be the equivalent of using a spade with a rubber handle, which would be very hard to control with precision.

THE SHAPE OF THE NAILS

Before beginning your experiments, it is important to have the nail correctly shaped. Obviously if the nail is too long, it is liable to hang up on the string. If it is too short, it cannot give enough impetus to the stroke. Finally, if it is square in shape the corner will catch, making it almost impossible to play. If necessary, adjust the shape before proceeding.

File the nails so that a thin, even ridge may be seen above the fingertip when you look at your hand with the palm facing you. Finally, smooth the nails with fine (600 grade) sandpaper to remove any roughness left from the filing. This last step is essential if a scratchy tone is to be avoided when playing with the nails.

FINGER IDENTIFICATION

It is important to recognize how the fingers of each hand are identified, and this is shown in Fig. 7. The left hand is simple, the fingers being numbered 1-4 with no number for the thumb since it is not used. For the right hand the initial letters are used of the appropriate Spanish words: *Pulgar*=Thumb, *Indicio*=Index finger, *Medio*=Middle finger and *Anular*=Ring finger.

Fig. 7 FINGER IDENTIFICATION.

These indications are universally used and should be memorized.

FIRST PRACTICE OF THE REST STROKE. ALTERNATION.

The movements described above should be tried out experimentally on the upper three strings. Try for a good quality note using first the index (*i*), then the middle (*m*) fingers. In playing a series of notes, always alternate the fingers. You may start with *i* or *m*—there is no fixed rule—but avoid using the same finger twice. Alternating the fingers produces a natural rhythm comparable to walking. Repeating the same finger is like hopping when you could walk. As one finger plays, the other should move forward to be ready to play in its turn.

THE LEFT HAND

The basic movements of the left hand are quite simple. The fingers press immediately behind the metal frets, shortening the vibrating length of the string and thereby changing its pitch.

The overall position of the left hand and wrist is of great importance. A good position ensures maximum reach, a minimum of excessive movement, and general stability. Of particular importance is the position of the thumb.

Fig. 8 LEFT-HAND POSITION.

The illustration shows the correct position for the left hand with all fingers in place. The following points are important:

1. The thumb presses against the center of the back of the neck, just forward of the first fret. The pressure is as light as possible consistent with holding the strings down.
2. The first joint of the thumb does not bend. Allowing the joint to bend gives rise to insecurity in the left hand, since the thumb functions as a stable point of reference.
3. The fingers are as vertical as possible in relation to the fingerboard. Adjust the wrist to achieve this.

FIRST LEFT-HAND EXERCISE

The following exercise is excellent for stretching out and strengthening the left hand, and may profitably be practiced every day for the first few weeks.

1. With the thumb in the correct position, hammer down the first finger behind the first fret of the sixth string. Make as loud a sound as possible.
2. Leaving the first finger where it is, hammer in a similar way with the second finger behind the second fret.
3. Repeat the procedure with the third finger. Notice that it is much harder to reach right up to the third fret with the other two fingers in position; but try anyway, because this is an area where stretch must be developed.
4. Complete the movement by hammering with the little finger behind the fourth fret.
5. Repeat all the movements on the fifth and remaining strings. Remember to leave each finger down after it has hammered. On the third, second, and first strings it is harder to make the note sound with the left hand alone, but it *can* be done with practice.

PUTTING BOTH HANDS TOGETHER

The time has now arrived to co-ordinate the two hands in playing a series of notes. The right hand will play alternating rest strokes, and the left hand will move up a fret at a time as in the previous exercise.

1. Place the left hand first finger behind the first fret of the top (first) string. With the right hand play a firm rest stroke with the *i* finger.
2. Leaving the first finger in position, place the second finger behind the second fret. Play a rest stroke with the *m* finger.
3. Leaving the first two fingers down, continue to play the third and fourth frets, doing rest strokes with *i* and *m* in turn.
4. Repeat the procedure on the second and third strings.

FURTHER DEVELOPMENT

When you feel confident with the above exercise try it in reverse, playing from the fourth to the first fret on each of the top three strings. In working backwards it is not necessary to place all the fingers in advance. Simply start with the fourth finger, then the third and so on. As a final development try the following complete exercise.

1. Starting at the sixth string, play upwards from frets one to four, following on with the fifth and all other strings.
2. When you arrive at the highest point, the fourth fret of the first string, start down and play all strings from fourth to first fret. This is an excellent co-ordination exercise which will prepare your hands for playing from music.

THE FREE STROKE

For the sake of completeness we will consider briefly the other principal right hand movement known as the FREE STROKE.

The free stroke is easy to understand, since the movements are similar to those of the rest stroke except in the final phase. Instead of coming to rest, the finger just clears the adjacent string and comes to a halt in the air approximately above it.

Fig. 9 THE FREE STROKE.

The free stroke becomes important in the performance of chords and arpeggios, which are considered in detail after sufficient notes have been learned. For now, the stroke may be practiced experimentally to distinguish it clearly from the rest stroke.

CONCLUSION

This first section on basic technique is a very important one, since at the end of it you are really playing the guitar. Remember particularly to check the following:

1. Is your sitting position correct, as in the illustration?
2. Is your left arm relaxed?
3. Is your thumb behind the neck? Not bent at the joint?
4. Are your left-hand fingers as vertical as possible when you play?
5. Are your right-hand knuckles on a line with the strings?
6. Is your right wrist correctly arched?

If the exercises have been thoroughly practiced and you can comfortably co-ordinate the two hands, you are now ready for the challenge and enjoyment of beginning to play from music.

NOTES ON THE FIRST STRING

i = index
m = middle

Four beats to a measure.

count One beat

count Two beats

Three beats to a measure.

count Three beats

count Four beats

The diagrams above summarize the information necessary to play the exercises that follow. First memorize the three notes by playing them and saying aloud the letter names of the notes. Use rest strokes as learned in the previous section, and remember to alternate the fingers. With the left hand leave the fingers on where possible. For instance, when playing the progression F, G, F, the F should remain placed when you play the G. It is then ready when you want to play the F again.

COUNTING

Count the beats as you play, either out loud or in your head. It is the only sure way of measuring the time for each note, and if you form this habit at the very beginning you will progress much faster. Some people find that tapping the right foot helps to keep the beat even. The first beat of each measure should have a slight extra stress as it is the important downbeat (the conductor's baton always comes *down* on the first beat). Remember that you can go as slowly as you like as long as you give each note its proper time value.

Exercise 1

With this and all later exercises you are only concerned with the upper staff. The lower one is for the teacher.

The numbers beside the notes indicate left-hand fingering, *not the frets*, although they often coincide.

You will learn the notes more quickly if you do *not* write the letters (E, F, G, etc.) underneath them.

Count: ONE TWO THREE FOUR ONE TWO THREE FOUR ONE TWO THREE FOUR ONE TWO THREE FOUR

Exercise 2

Count: ONE TWO THREE FOUR ONE TWO THREE FOUR ONE TWO THREE FOUR ONE TWO THREE FOUR

Exercise 3

Exercise 3 is a 4/4 piece consisting of two systems. The right hand part is highly technical, featuring a continuous sequence of triplets and specific fingerings (0, 1, 2, 3) to be practiced. The left hand part provides a steady accompaniment of eighth notes, primarily on the lower register of the piano.

Exercise 4

In this exercise the left-hand fingering has been omitted to ensure that you read from the notes rather than the numbers. Remember to keep up the alternation.

Exercise 4 is a 3/4 piece consisting of two systems. The right hand part features a melodic line with specific fingerings (i, m, i, m, i, m) and accents. The left hand part consists of a bass line with dotted half notes and some chords. The first two measures of the left hand are explicitly labeled "ONE TWO THREE" to indicate the counting pattern. The exercise focuses on maintaining a steady alternation between the hands.

NOTES ON THE SECOND STRING

 = Quarter note rest

 = Half note rest

 = Whole note rest

RESTS AND DAMPING

Since a rest sign calls for a period of silence, it is necessary to be able to stop a string from sounding when a rest occurs.

With a stopped string (i.e. when a left-hand finger is used) all that is necessary is to release the pressure of the left hand finger from the fingerboard. The finger can still be in contact with the string; it is not necessary to take it off completely.

With an open string an easy way to damp the sound is to touch the string with the pad of the finger that would play next. For example, if you have just played the open first string with *i*, touch it with the pad of *m* to stop the sound. This may sound complicated, but is in fact very easy when you have done it a few times.

Exercise 5

In measure five, notice that the *i* finger is repeated. This is done sometimes after a long note or a rest, in cases when "changing step" results in smoother fingering in the measures to come.

In measure nine the fourth finger of the left hand is used on the G; this makes the transition from G to D smoother than a jump of the third finger.

The musical score for Exercise 5 is written in 3/4 time and G major. It consists of three systems of two staves each. Fingerings are indicated by letters 'm' (middle) and 'i' (index) with numbers 0, 1, 3, and 4. Measure numbers 1 through 10 are placed above the first staff of each system.

System 1 (Measures 1-5):

- Measure 1: Treble clef, G4 (m 0), A4 (i 1), B4 (m 3), A4 (i 1). Bass clef, G3 (p.).
- Measure 2: Treble clef, G4 (m 1), A4 (i 3), B4 (m 0), A4 (i 3). Bass clef, G3 (p.), A3 (p.), B3 (p.), C#4 (p.).
- Measure 3: Treble clef, G4 (i 3), A4 (m 0), B4 (i). Bass clef, G3 (p.), A3 (p.), B3 (p.), C#4 (p.).
- Measure 4: Treble clef, G4 (i 3), A4 (m 0), B4 (i). Bass clef, G3 (p.), A3 (p.), B3 (p.), C#4 (p.).
- Measure 5: Treble clef, G4 (i 3), A4 (m 0), B4 (i). Bass clef, G3 (p.), A3 (p.), B3 (p.), C#4 (p.).

System 2 (Measures 6-10):

- Measure 6: Treble clef, G4 (m 1), A4 (i 3), B4 (m 0), A4 (i 3). Bass clef, G3 (p.), A3 (p.), B3 (p.), C#4 (p.).
- Measure 7: Treble clef, G4 (m 1), A4 (i 3), B4 (m 0), A4 (i 3). Bass clef, G3 (p.), A3 (p.), B3 (p.), C#4 (p.).
- Measure 8: Treble clef, G4 (m 1), A4 (i 3), B4 (m 0), A4 (i 3). Bass clef, G3 (p.), A3 (p.), B3 (p.), C#4 (p.).
- Measure 9: Treble clef, G4 (m 1), A4 (i 3), B4 (m 0), A4 (i 3). Bass clef, G3 (p.), A3 (p.), B3 (p.), C#4 (p.).
- Measure 10: Treble clef, G4 (m 1), A4 (i 3), B4 (m 0), A4 (i 3). Bass clef, G3 (p.), A3 (p.), B3 (p.), C#4 (p.).

System 3 (Measures 11-15):

- Measure 11: Treble clef, G4 (i 1), A4 (m 0), B4 (i 3), A4 (i 3). Bass clef, G3 (p.), A3 (p.), B3 (p.), C#4 (p.).
- Measure 12: Treble clef, G4 (i 1), A4 (m 0), B4 (i 3), A4 (i 3). Bass clef, G3 (p.), A3 (p.), B3 (p.), C#4 (p.).
- Measure 13: Treble clef, G4 (i 1), A4 (m 0), B4 (i 3), A4 (i 3). Bass clef, G3 (p.), A3 (p.), B3 (p.), C#4 (p.).
- Measure 14: Treble clef, G4 (i 1), A4 (m 0), B4 (i 3), A4 (i 3). Bass clef, G3 (p.), A3 (p.), B3 (p.), C#4 (p.).
- Measure 15: Treble clef, G4 (i 1), A4 (m 0), B4 (i 3), A4 (i 3). Bass clef, G3 (p.), A3 (p.), B3 (p.), C#4 (p.).

Exercise 6

Exercise 6 is a 4/4 piece consisting of three systems of three staves each. The first system contains five measures, the second system contains five measures, and the third system contains six measures. The right hand (treble clef) features a melodic line with various fingerings indicated by numbers (0, 1, 3) and letters (m, i). The left hand (bass clef) provides a steady accompaniment using eighth and quarter notes. The piece concludes with a double bar line in the sixth measure of the third system.

Exercise 7

As before, the left-hand fingering is omitted to check your note recognition.

Exercise 7 is a 4/4 piece consisting of three systems of three staves each. The first system contains five measures, the second system contains five measures, and the third system contains six measures. The right hand (treble clef) features a melodic line with fingerings indicated by numbers (0) and letters (i, m). The left hand (bass clef) provides a steady accompaniment using eighth and quarter notes. The piece concludes with a double bar line in the sixth measure of the third system.

PICK-UP NOTES

Music does not always begin on the first beat of the measure. There are sometimes one or more notes which precede the first stressed downbeat, and these are known as "pick-up" notes. When a piece begins with an incomplete measure, the final measure will also be incomplete, and the two will add up to one full measure.

The counting is not difficult as long as you identify which beat of the measure you start on, and count it accordingly. The song that follows shows how to do this.

THE BANKS OF THE OHIO

Traditional

The musical score for "The Banks of the Ohio" is written in 4/4 time. It consists of four systems of piano accompaniment. The first system includes a count: "Count: TWO THREE FOUR" for the first measure, followed by "ONE TWO THREE FOUR" for the next three measures. The score uses various musical notations including eighth notes, quarter notes, and half notes, with fingerings (1, 0, 3, 4) and dynamics (p, m, i) indicated. The piece concludes with a double bar line.

NOTES ON THE THIRD STRING

COUNTING EIGHTH NOTES

Eighth notes are twice as fast as quarter notes, so a way has to be found to divide the main counts in two. This is done by inserting the word "and" between the main counts.

Notice that the number counts go at exactly the same speed in both examples, but the insertion of the "ands" in the second example gives the effect of doubling the time. Play and count the examples before going on to the exercises.

Exercise 8

Exercise 9

The musical score for Exercise 9 consists of four systems, each with a piano accompaniment and a vocal line. The piano part is written in 4/4 time, and the vocal line is written in 4/4 time. Fingerings are indicated by numbers 0-4 above the notes, and counts are written below the vocal line.

System 1:

- Piano:** Treble clef, key of C major. Notes: C4 (half), E4 (quarter), G4 (quarter), F4 (quarter), E4 (quarter), D4 (half). Bass clef: C3 (half), E2 (quarter), G2 (quarter), F2 (quarter), E2 (quarter), D2 (half).
- Vocal:** Treble clef. Notes: C4 (half), E4 (quarter), G4 (quarter), F4 (quarter), E4 (quarter), D4 (half). Count: ONE AND TWO AND THREE FOUR.

System 2:

- Piano:** Treble clef. Notes: C4 (half), E4 (quarter), G4 (quarter), F4 (quarter), E4 (quarter), D4 (half). Bass clef: C3 (half), E2 (quarter), G2 (quarter), F2 (quarter), E2 (quarter), D2 (half).
- Vocal:** Treble clef. Notes: C4 (half), E4 (quarter), G4 (quarter), F4 (quarter), E4 (quarter), D4 (half). Count: ONE TWO THREE AND FOUR.

System 3:

- Piano:** Treble clef. Notes: C4 (half), E4 (quarter), G4 (quarter), F4 (quarter), E4 (quarter), D4 (half). Bass clef: C3 (half), E2 (quarter), G2 (quarter), F2 (quarter), E2 (quarter), D2 (half).
- Vocal:** Treble clef. Notes: C4 (half), E4 (quarter), G4 (quarter), F4 (quarter), E4 (quarter), D4 (half). Count: ONE AND TWO AND THREE FOUR.

System 4:

- Piano:** Treble clef. Notes: C4 (half), E4 (quarter), G4 (quarter), F4 (quarter), E4 (quarter), D4 (half). Bass clef: C3 (half), E2 (quarter), G2 (quarter), F2 (quarter), E2 (quarter), D2 (half).
- Vocal:** Treble clef. Notes: C4 (half), E4 (quarter), G4 (quarter), F4 (quarter), E4 (quarter), D4 (half). Count: ONE AND TWO THREE AND FOUR.

Exercise 10

This exercise is based on an extract from the song "Flow Gently Sweet Afton," music by James E. Spilman.

The musical score for Exercise 10 is presented in three systems, each with a treble and bass staff. The key signature is one flat (B-flat) and the time signature is 3/4. The exercise is a fingerboard exercise for guitar, indicated by the numbers 0, 1, 2, 3 above the notes.

System 1: The treble staff contains six measures. The first measure has a whole note G2 (0). The second measure has a quarter note A2 (1), a quarter note B2 (0), and a quarter note C3 (3). The third measure has a quarter note B2 (1), a quarter note A2 (0), and a quarter note G2 (0). The fourth measure has a quarter note F2 (2), a quarter note E2 (1), and a quarter note D2 (1). The fifth measure has a quarter note D2 (0), a quarter note C2 (1), and a quarter note B1 (3). The sixth measure has a quarter note A1 (1), a quarter note G1 (3), and a quarter note F1 (0). The bass staff contains six measures of whole notes: G2, A2, B2, C3, D3, and E3.

System 2: The treble staff contains five measures. The first measure has a whole note G2 (0). The second measure has a quarter note A2 (3), a quarter note B2 (0), and a quarter note C3 (1). The third measure has a quarter note B2 (3), a quarter note A2 (0), and a quarter note G2 (1). The fourth measure has a quarter note F2 (1), a quarter note E2 (0), and a quarter note D2 (3). The fifth measure has a quarter note D2 (1), a quarter note C2 (0), and a quarter note B1 (3). The bass staff contains five measures of whole notes: G2, A2, B2, C3, and D3.

System 3: The treble staff contains six measures. The first measure has a whole note G2 (1). The second measure has a quarter note A2 (2), a quarter note B2 (0), and a quarter note C3 (1). The third measure has a quarter note B2 (1), a quarter note A2 (3), and a quarter note G2 (0). The fourth measure has a quarter note F2 (0), a quarter note E2 (3), and a quarter note D2 (1). The fifth measure has a quarter note D2 (0), a quarter note C2 (2), and a quarter note B1 (0). The sixth measure has a quarter note A1 (1), a quarter note G1 (0), and a quarter note F1 (1). The bass staff contains six measures of whole notes: G2, A2, B2, C3, D3, and E3. The final measure of the bass staff is marked with a double bar line and a repeat sign.

The musical score is written for guitar, consisting of five systems, each with a treble and bass staff. The music is in 4/4 time. Fingerings are indicated by numbers 1-4 above notes, and natural harmonics by 0. The score includes various musical notations such as eighth notes, quarter notes, and rests. The piece concludes with a double bar line at the end of the fifth system.

System 1: Treble staff has notes G4 (1), A4 (0), B4 (1), C5 (4), D5 (4), E5 (1), F#5 (0), G5 (0). Bass staff has eighth notes G2, A2, B2, C3, D3, E3, F#3, G3.

System 2: Treble staff has notes G4 (1), A4 (0), B4 (1), C5 (4), D5 (4), E5 (1), F#5 (0), G5 (0). Bass staff has eighth notes G2, A2, B2, C3, D3, E3, F#3, G3.

System 3: Treble staff has notes G4 (1), A4 (0), B4 (0), C5 (1), D5 (0), E5 (0), F#5 (0), G5 (0). Bass staff has eighth notes G2, A2, B2, C3, D3, E3, F#3, G3.

System 4: Treble staff has notes G4 (0), A4 (0), B4 (0), C5 (0), D5 (3), E5 (1), F#5 (3), G5 (0). Bass staff has eighth notes G2, A2, B2, C3, D3, E3, F#3, G3.

System 5: Treble staff has notes G4 (0), A4 (0), B4 (1), C5 (0), D5 (4), E5 (4), F#5 (1), G5 (1), A5 (0), B5 (0), C6 (3), D6 (1). Bass staff has eighth notes G2, A2, B2, C3, D3, E3, F#3, G3.

NOTES ON THE FOURTH STRING

THUMB TECHNIQUE

The lower three strings are usually played with the thumb. The thumb may play a rest or a free stroke, the free stroke being by far the most common. The reason for this is that the lower strings tend to have greater natural resonance and therefore respond sufficiently to the lighter free stroke. In addition in a fast passage with the thumb, it is easier to repeat free strokes than rest strokes.

The thumb rest stroke does have its place, but this is usually reserved for passages of particular emphasis.

The illustrations demonstrate the two strokes, which should be tried experimentally before proceeding to the exercises.

Play Exercises 11 and 12, first with the free stroke, then for completeness try them with the rest stroke as well.

THUMB TECHNIQUE

Fig. 10 THE THUMB.

A. Like the fingernail the thumbnail is filed to an even curve.

B. The angle of the thumb as it prepares to play.

C. Preparation. The string is in contact with the pad of the thumb, close to, but not touching the nail.

D. Completion, rest stroke. The thumb comes to rest against the next string.

E. Completion, the free stroke. The thumb sweeps clear of the adjacent string.

F. This joint does not bend while doing either stroke.

Exercise 11

Use the thumb throughout.

The musical score for Exercise 11 is presented in three systems. Each system consists of a piano accompaniment (left hand) and a single melodic line (right hand). The key signature is one sharp (F#) and the time signature is 3/4. The piano accompaniment is written in a simplified style, using block chords and single notes, often with fingerings indicated by numbers 0, 2, 3, and I. The melodic line is written in a standard staff with notes and rests. The exercise is divided into three systems, each containing five measures. The first system starts with a piano introduction in the left hand. The second system includes a measure with a 'I' marking in the piano part. The third system concludes with a double bar line.

System 1:

- Measure 1: Piano (0, 0), Melody (G4, quarter note)
- Measure 2: Piano (0, 2), Melody (A4, quarter note)
- Measure 3: Piano (3, 2, 0), Melody (B4, quarter note)
- Measure 4: Piano (2), Melody (A4, quarter note)
- Measure 5: Piano (0, 2, 3), Melody (G4, quarter note)

System 2:

- Measure 1: Piano (2, 3, 0), Melody (F#4, quarter note)
- Measure 2: Piano (3, 0), Melody (G4, quarter note)
- Measure 3: Piano (2), Melody (A4, quarter note)
- Measure 4: Piano (I), Melody (B4, quarter note)
- Measure 5: Piano (0), Melody (A4, quarter note)

System 3:

- Measure 1: Piano (3), Melody (G4, quarter note)
- Measure 2: Piano (2, 2), Melody (F#4, quarter note)
- Measure 3: Piano (3, 2, 0), Melody (G4, quarter note)
- Measure 4: Piano (2, 0), Melody (A4, quarter note)
- Measure 5: Piano (0), Melody (B4, quarter note)

Exercise 12

Notice the use of the letter *p* to indicate the thumb, derived from the Spanish word "pulgar."

The musical score for Exercise 12 is written for guitar in 4/4 time, spanning three systems of two staves each (treble and bass clef). The piece features a melodic line in the treble clef and a harmonic accompaniment in the bass clef. The key signature has one sharp (F#), and the time signature is 4/4.

System 1: The treble clef begins with a whole note chord (F#4, A4, C5) marked with a '0' (thumb). This is followed by a sequence of eighth notes: F#4 (thumb), A4 (2), B4 (3), G4 (0), F#4 (2), E4 (3), D4 (2). The bass clef provides a harmonic accompaniment with a series of chords: F#4-A4-C5, F#4-A4-C5, F#4-A4-C5, F#4-A4-C5, F#4-A4-C5, F#4-A4-C5, F#4-A4-C5, F#4-A4-C5.

System 2: The treble clef continues with eighth notes: C5 (0), B4 (2), A4 (3), G4 (0), F#4 (2), E4 (3), D4 (2), C5 (0). The bass clef continues with the same harmonic accompaniment. The system concludes with a measure marked with a 'p' (thumb) in the treble clef, indicating a change in the harmonic accompaniment.

System 3: The treble clef begins with a whole note chord (F#4, A4, C5) marked with a '0'. This is followed by a sequence of eighth notes: F#4 (thumb), A4 (2), B4 (3), G4 (0), F#4 (2), E4 (3), D4 (2), C5 (0). The bass clef provides a harmonic accompaniment with a series of chords: F#4-A4-C5, F#4-A4-C5, F#4-A4-C5, F#4-A4-C5, F#4-A4-C5, F#4-A4-C5, F#4-A4-C5, F#4-A4-C5.

Exercise 13

This exercise is based on a famous chorale theme, for which J. S. Bach did many settings. In moving from thumb to fingers, try to avoid moving the hand. First use free strokes with the thumb, rest strokes with the fingers.

After you have played the piece a few times, try using free strokes with the fingers on all third-string notes, and rest strokes on the second and first strings. Although a little complicated to remember, this fingering will feel more natural.

The musical score for Exercise 13 is presented in four systems, each containing two staves (treble and bass clef). The time signature is 4/4. The key signature has one sharp (F#). The melody is written in the upper staff, and the accompaniment is in the lower staff. Fingerings (0-3) and bowing directions (p for pull, i for in, m for middle, r for rest) are indicated above the melody notes.

System 1: Measures 1-2. Melody: G4 (p), A4 (i), B4 (m), A4 (p), G4 (p). Accompaniment: D4, E4, F#4, G4.

System 2: Measures 3-4. Melody: F#4 (i), E4 (m), D4 (p), C4 (p). Accompaniment: D4, E4, F#4, G4.

System 3: Measures 5-6. Melody: B4 (m), A4 (i), G4 (m), F#4 (i), E4 (m), D4 (p). Accompaniment: D4, E4, F#4, G4.

System 4: Measures 7-8. Melody: C4 (i), B4 (p), A4 (p), G4 (p). Accompaniment: D4, E4, F#4, G4.

NOTES ON THE FIFTH AND SIXTH STRINGS

The notes below the staff are harder to memorize for some students, so the following exercises should be studied carefully and repeated where necessary. Distinguish particularly between the A on the *second* ledger line and the F on the *third*. In the same way be careful not to confuse the low E with the G since at first they look somewhat similar.

As soon as you are really familiar with these lower notes the way will be open to playing chords, arpeggios, and more complex pieces.

Exercise 14

In measure eleven notice that the fourth finger is used on the C, instead of the more usual third finger. This is to avoid jumping the third finger from string to string.

The image shows three systems of musical notation for Exercise 14. Each system consists of a grand staff (treble and bass clefs) with a 4/4 time signature. The first system shows a scale of the fifth string (A, B, C, B, A) and a scale of the sixth string (E, F, G, F, E). The second system shows a scale of the fifth string (A, B, C, B, A) and a scale of the sixth string (E, F, G, F, E). The third system shows a scale of the fifth string (A, B, C, B, A) and a scale of the sixth string (E, F, G, F, E). The exercises are written in a way that allows for the study of fingerings and the relationship between the two strings.

FANDANGO

Traditional

0 3 2 0 1 2 0 3 0 2 0 1 2 0 3 0 2

3 2 0 1 3 4 2 3 0 3 4 0 2 3

0 2 3 0 2 3 0 2 3 0 2 3 0 2 3 0 2 3 0 1 3

0 2 3 0 3 2 3 2 0 1 3 4 0 0 1 3 4 2 3

Exercise 15

The bass notes have been left unfingered so that you may check how well you know them.

The musical score for Exercise 15 is written in 3/4 time and consists of five systems of two staves each. The right hand (treble clef) plays a melody, and the left hand (bass clef) plays a bass line. The exercise is designed to help with finger independence and recognition of bass notes.

System 1: The right hand starts with a quarter rest, followed by a quarter note G4, a quarter note A4, a quarter note B4, a quarter note C5, a quarter note B4, a quarter note A4, a quarter note G4, and a quarter note F#4. The left hand plays a series of chords, with the third finger (III) indicated for the first two measures.

System 2: The right hand continues the melody with a quarter note E4, a quarter note D4, a quarter note C4, a quarter note B3, a quarter note A3, a quarter note G3, a quarter note F#3, and a quarter note E3. The left hand continues with chords, with the third finger (III) indicated for the first two measures.

System 3: The right hand plays a sequence of notes: G4 (finger 3), F#4 (finger 2), E4 (finger 0), D4 (finger 3), C4 (finger 2), B3 (finger 0), A3 (finger 2), G3 (finger 3), F#3 (finger 0), and E3 (finger 2). The left hand continues with chords, with the third finger (III) indicated for the first two measures.

System 4: The right hand plays a sequence of notes: D4 (finger 3), C4 (finger 0), B3 (finger 3), A3 (finger 0), G3 (finger 3), F#3 (finger 0), E3 (finger 3), and D3 (finger 0). The left hand continues with chords, with the third finger (III) indicated for the first two measures.

System 5: The right hand plays a sequence of notes: C4 (finger 3), B3 (finger 0), A3 (finger 3), G3 (finger 0), F#3 (finger 3), E3 (finger 0), D3 (finger 3), and C3 (finger 0). The left hand continues with chords, with the third finger (III) indicated for the first two measures. The exercise concludes with a double bar line.

Ties

When two notes are joined by a TIE SIGN only the first is played, but it is held for the time value of both notes. This is particularly useful when a note is required to last from one measure to another.

In the example the F is held for two beats. The correct count for the two measures would be: "One Two Three *Four* One Two Three Four."

Exercise 16

Exercise 16 is a four-measure piano exercise in 4/4 time, consisting of a treble and bass staff. Fingerings are indicated by numbers 0-3 above the notes. Slurs are used to group notes across measures.

- Measure 1:** Treble: C4 (0), D4 (1), E4 (3), F4 (3). Bass: C3 (0), D3 (1), E3 (3), F3 (3).
- Measure 2:** Treble: F4 (1), G4 (3), A4 (1), B4 (0). Bass: F3 (0), G3 (1), A3 (3), B3 (0).
- Measure 3:** Treble: C5 (1), D5 (3), E5 (1), F5 (0). Bass: C4 (0), D4 (1), E4 (3), F4 (3).
- Measure 4:** Treble: G5 (1), A5 (3), B5 (1), C6 (0). Bass: G4 (0), A4 (1), B4 (3), C5 (0).

SHARPS AND FLATS

Sharps (\sharp) and Flats (\flat) are known as *accidentals* when they appear in the course of a piece. A sharp *raises* a note by a half step (one fret). A flat *lowers* a note by a half step.

Examples

A flat note a half step below an open string must be found on the next lower string. This will normally be at the fourth fret of the lower string.

Examples

The exception is the B flat, which is found at the *third* fret of the third string. You will remember from your tuning that the distance from the second to the third string is different from the others.

Example

A sharp or flat sign affects not only the note beside which it is placed, but all other occurrences of the same note for the remainder of the measure. Thus if an F is sharpened at the beginning of a measure, all F's that follow in the same measure must also be sharpened.

Example

This can be cancelled, however, by the use of a *Natural* sign (♮).

Example

Play the example below several times until you fully understand the effects of the various accidentals.

Example

Exercise 17

Exercise 17 is a 4-measure piece in 4/4 time, written for guitar. The score is presented in four systems, each with a treble and bass staff. The key signature is one flat (B-flat), and the time signature is 4/4. The piece features a simple melody in the treble staff and a supporting bass line in the bass staff. Fingering numbers (0, 1, 2, 3) are indicated above the notes in the treble staff. The piece concludes with a double bar line at the end of the fourth measure.

System 1:

- Measure 1: Treble (G4, A4, Bb4, A4), Bass (G2, B1).
- Measure 2: Treble (A4, B4, A4, G4), Bass (A2, C3).
- Measure 3: Treble (G4, A4, B4, A4), Bass (D3, F3).
- Measure 4: Treble (G4, A4, B4, A4), Bass (E3, G3).

System 2:

- Measure 1: Treble (A4, B4, A4, G4), Bass (A2, C3).
- Measure 2: Treble (G4, A4, B4, A4), Bass (D3, F3).
- Measure 3: Treble (A4, B4, A4, G4), Bass (E3, G3).
- Measure 4: Treble (G4, A4, B4, A4), Bass (F3, A3).

System 3:

- Measure 1: Treble (A4, B4, A4, G4), Bass (A2, C3).
- Measure 2: Treble (G4, A4, B4, A4), Bass (D3, F3).
- Measure 3: Treble (A4, B4, A4, G4), Bass (E3, G3).
- Measure 4: Treble (G4, A4, B4, A4), Bass (F3, A3).

System 4:

- Measure 1: Treble (A4, B4, A4, G4), Bass (A2, C3).
- Measure 2: Treble (G4, A4, B4, A4), Bass (D3, F3).
- Measure 3: Treble (A4, B4, A4, G4), Bass (E3, G3).
- Measure 4: Treble (G4, A4, B4, A4), Bass (F3, A3).

Exercise 18

Exercise 18 is a 4/4 piece for guitar, consisting of three systems of two staves each. The first staff is the treble clef with a key signature of one sharp (F#) and a 4/4 time signature. The second staff is the bass clef. Fingerings are indicated by numbers 0-4 above or below notes. The piece ends with a double bar line.

System 1:

- Measure 1: Treble (0, 4, 0, 3), Bass (F#2, F#1, F#3)
- Measure 2: Treble (1, 0, 1, 0), Bass (F#2, F#1, F#3)

System 2:

- Measure 3: Treble (2, 1, 0, 1), Bass (F#2, F#1, F#3)
- Measure 4: Treble (0, 1, 2, 0), Bass (F#2, F#1, F#3)
- Measure 5: Treble (0, 4, 0, 3), Bass (F#2, F#1, F#3)
- Measure 6: Treble (2, 1, 0, 3), Bass (F#2, F#1, F#3)

System 3:

- Measure 7: Treble (1, 0, 1, 2), Bass (F#2, F#1, F#3)
- Measure 8: Treble (3, 2, 3, 4), Bass (F#2, F#1, F#3)
- Measure 9: Treble (0, 1, 3, 2), Bass (F#2, F#1, F#3)
- Measure 10: Treble (1, 0, 1, 0), Bass (F#2, F#1, F#3)
- Measure 11: Treble (1, 0, 0, 3), Bass (F#2, F#1, F#3)
- Measure 12: Treble (1), Bass (F#2, F#1, F#3)

MINUET

Henry Purcell

6th to D

0 0

2 4 -2 -3 0 1 -1 4 2 3 4

4 4 2 4 3 4 4

1 4 3 1 2 1 4 3 1 4

2 2

Detailed description: This is a musical score for a Minuet by Henry Purcell, arranged for guitar. The score is written in 3/4 time and consists of five systems of music. Each system has a treble and bass staff. The treble staff contains the melody, while the bass staff contains the accompaniment. Fingering numbers (1-4) are placed below notes in both staves. Chord symbols (e.g., 0, 2, 4, -2, -3, 0, 1, -1, 4, 2, 3, 4) are placed below the bass staff. The score includes various musical notations such as eighth notes, quarter notes, and rests. The piece concludes with a double bar line at the end of the fifth system.

CHORD TECHNIQUE

Two or more notes played simultaneously are known as a chord. The technique used for chords is that of the free stroke for both fingers and thumb.

The illustration below shows a simple chord played by *i* and *m* on the top two strings. At the end of the movement both fingers are clear of the adjacent strings.

Fig. 11 A TWO-NOTE CHORD PLAYED BY *I* AND *M*.

In Figure 12 the chord is played by the thumb and middle finger. At the completion of the movement, both thumb and fingers will be above the strings, but the *hand does not pull out from the strings*. The movement may be compared to an aircraft partially retracting its undercarriage without itself gaining height.

Whether there are two, three, or four notes in a chord, the technique is essentially the same. The important thing to remember is that the fingers should be placed in position on the strings before playing — do not snatch at the chord.

Fig. 12 A CHORD PLAYED BY *P* AND *M*.

Exercise 19

This chord study introduces the use of the ring (*a*) finger, which becomes increasingly important as you progress with chords and arpeggios. Follow the right-hand fingering exactly, since it is comfortable and natural to the hand.

Exercise 20

Based on the popular Spanish theme “La Folia,” this exercise starts simply but is progressive in difficulty. Remember not to lift the hand when playing the chords.

The image displays a page of musical notation for guitar, consisting of five staves. The notation is written in a single melodic line using a treble clef. The key signature is one sharp (F#), and the time signature is 4/4. The music features various fingerings (1-4) and articulations (accents, slurs). The notation is presented in a clean, black-and-white format.

Traditional

All the chords may be played with p , i and m . Notice that although it may take longer to learn the notes at first the three note chords are not significantly more difficult to play.

ARPEGGIOS AND TRIPLETS

An ARPEGGIO is a broken chord, i.e. a chord whose notes are played in succession instead of simultaneously.

Example

(a)

Chord

(b)

Broken chord or arpeggio

In example (b) the 3 above the group of notes shows that the three notes occupy the time of one quarter note. The group is known as a TRIPLET, and is counted "One - and - a" with three even syllables.

Example

Count: One and a Two and a Three and a Four and a

In a succession of triplets, as above, the three is often only indicated over the first group.

TECHNIQUE OF THE ARPEGGIO

The technique for playing arpeggios differs according to the direction of the notes played by the fingers. In the explanation below the two types of arpeggio are distinguished as "upward" or "downward" as shown in these examples.

Example

THE UPWARD ARPEGGIO
The direction of the notes played by *i* and *m* is upward in pitch.

THE DOWNWARD ARPEGGIO
The pattern played by *m* and *i* descends in pitch.

The Upward Arpeggio

This very common form of arpeggio starts with the selection of all the notes as if to play a chord. Then each finger plays a free stroke as shown in the illustrations.

Fig. 13 THE UPWARD ARPEGGIO.

Exercise 24

Based on the study in three-note chords, this exercise may be used to practice the downward arpeggio as well.

Exercise 24 is a guitar exercise in 3/4 time, consisting of five staves of music. The notation includes fingerings (p, i, m) and fret numbers (0, 1, 2, 3, 4) for each note. The exercise is designed to practice downward arpeggios.

Staff 1: Measures 1-3 show a descending arpeggio pattern (p-i-m) starting on the 3rd fret, moving down to the 1st fret, and then to the open string (0). Measures 4-6 continue the pattern with different fretting.

Staff 2: Measures 7-9 show a descending arpeggio pattern starting on the 3rd fret, moving down to the 2nd fret, and then to the open string (0). Measures 10-12 continue the pattern with different fretting.

Staff 3: Measures 13-15 show a descending arpeggio pattern starting on the 2nd fret, moving down to the 1st fret, and then to the open string (0). Measures 16-18 continue the pattern with different fretting.

Staff 4: Measures 19-21 show a descending arpeggio pattern starting on the 2nd fret, moving down to the 1st fret, and then to the open string (0). Measures 22-24 continue the pattern with different fretting.

Staff 5: Measures 25-27 show a descending arpeggio pattern starting on the 3rd fret, moving down to the 2nd fret, and then to the open string (0). Measures 28-30 continue the pattern with different fretting.

COMBINING CHORDS AND MELODY

The main techniques for melody, chord, and arpeggio have now been learned; and the next step involves combining these techniques so that you will be able to play more interesting solos.

Melody and chords may be simply combined by holding one note of a chord while the other note is varied to form a melody.

Example

Simple chord

Chord combined with melody

In (b) above the third finger remains on the low C so that it will continue to sound while the upper C, D and E are played.

Exercise 25

In this exercise the right-hand fingering shows that when chords and melody are mixed the alternation is not strict and fingers are occasionally repeated.

Try to see from the music why this is done.

Use free strokes throughout.

Exercise 26

Use free strokes throughout

The musical score for Exercise 26 consists of three staves of music, each written in treble clef with a key signature of one sharp (F#) and a 3/4 time signature. The notation includes fingerings (i, m, a, p) and fret numbers (0, 1, 2, 3, 4) above the notes. Below each staff, there are fretted notes with fingerings and fret numbers, indicating the fretting hand's position.

Staff 1: The first staff contains 12 measures. The notes are: G4 (fingering: m, 0), A4 (fingering: i, 1), B4 (fingering: m, 0), C5 (fingering: i, 4), D5 (fingering: m, 0), E5 (fingering: i, 0), F#5 (fingering: m, 1), G5 (fingering: i, 2), A5 (fingering: m, 1), B5 (fingering: m, 0), C6 (fingering: i, 1), D6 (fingering: m, 2). The fretted notes below are: G3 (fingering: 3), A3 (fingering: 3), B3 (fingering: 0), C4 (fingering: 0), D4 (fingering: 3).

Staff 2: The second staff contains 12 measures. The notes are: G4 (fingering: i, 4), A4 (fingering: m, 0), B4 (fingering: i, 0), C5 (fingering: i, 2), D5 (fingering: m, 1), E5 (fingering: m, 0), F#5 (fingering: i, 2), G5 (fingering: m, 0), A5 (fingering: m, 4), B5 (fingering: i, 1), C6 (fingering: m, 4), D6 (fingering: i, 0). The fretted notes below are: G3 (fingering: 3), A3 (fingering: 0), B3 (fingering: 0), C4 (fingering: 0), D4 (fingering: 3), E4 (fingering: 3).

Staff 3: The third staff contains 12 measures. The notes are: G4 (fingering: m, 1), A4 (fingering: i, 0), B4 (fingering: m, 2), C5 (fingering: i, 0), D5 (fingering: m, 1), E5 (fingering: i, 2), F#5 (fingering: m, 0), G5 (fingering: i, 1), A5 (fingering: m, 2), B5 (fingering: i, 4), C6 (fingering: m, 1), D6 (fingering: i, 0). The fretted notes below are: G3 (fingering: 0), A3 (fingering: 3), B3 (fingering: 3), C4 (fingering: 0), D4 (fingering: 3), E4 (fingering: 0), F#4 (fingering: 0), G4 (fingering: 0), A4 (fingering: 0), B4 (fingering: 0), C5 (fingering: 0), D5 (fingering: 0).

Sometimes the upper part of the chord is held while the lower part moves. The parts are often referred to as VOICES, since each may be compared to an individual singer.

In the example it would be usual to say that the movement is in the lower, or bass, voice.

The two voices do not necessarily start on the same beat, and often move quite independently.

Example

As complicated as this may look at first, it can be quite easily “solved” by considering what happens on each beat. Here is the procedure for playing the first measure:

First Beat Play the low C to start the lower voice.

Second Beat Play the high C to start the upper voice. The low C must continue sounding.

Third Beat Play the upper voice E. The third finger is *still* on the low C so that it continues to sound.

The second measure proceeds as follows:

First Beat Play the upper voice D

Second Beat Play the open-string G. The fourth finger *remains on the high D* so that it continues to sound.

Third Beat Play the F on the fourth string. The little finger is *still* holding down the D.

Work through the above steps until the procedure is quite clear. You will notice that there is no particular difficulty in reading music in two lines: The secret is to decide what happens on each beat.

LA VOLTA

16th-Century Dance

The repeat sign  indicates that the first eight measures are played twice.

The musical score for 'La Volta' is presented in three staves, each containing eight measures of music. The notation is in treble clef with a 3/4 time signature. The first staff begins with a repeat sign. The second staff also begins with a repeat sign. The third staff begins with a repeat sign. The music is written in a style characteristic of 16th-century lute tablature, with numbers 0, 1, 2, 3, 4 indicating fingerings. The first staff ends with a repeat sign. The second staff ends with a repeat sign. The third staff ends with a repeat sign.

PRACTICE SUGGESTIONS

The pieces that follow have been chosen to enable you to practice all that you have learned so far, and to provide a beginning repertory of enjoyable music. They should be thoroughly studied before moving on to Part Two, and to ensure the best results the following suggestions are offered for practicing.

1. At this stage several short practice periods during the day will produce much better results than a single longer period.
2. Always take a break after about fifteen minutes of intensive practice. Your ability to learn is far greater after a pause for relaxation.
3. Do not attempt to practice when you are tired or not in the mood. You may feel virtuous, but the time is wasted.
4. Be patient with yourself and go slowly. This way the speed will come naturally in due course, and you will avoid the frustration that comes from trying to run before you can walk.
5. Keep in mind that the purpose is to make beautiful sounds, and that this can be done at an early stage and with very simple music.
6. At some time you will feel that your progress has been halted, and that you are on a plateau. This feeling is shared by almost everyone, and if you realize this and continue your regular practicing without feeling incompetent or discouraged you will soon pass through the stage and on to further achievement.
7. Realize that the difficulties you encounter are shared by most students. As

one example, the chord  which looks so simple on paper is very

difficult for almost all beginners. However, with practice the awkwardness disappears, and in time you will forget that it was ever a problem.

8. Enjoy yourself. Whatever your long-term goal may be the day to day practice can, and should, be a source of pleasure and satisfaction.

MOORISH DANCE

Traditional

The musical score for "Moorish Dance" is written in 4/4 time and features a key signature of one sharp (F#). The notation is presented on ten staves, each beginning with a treble clef. The music is characterized by a mix of eighth and sixteenth notes, often beamed together in groups. Fingerings are indicated by numbers 0 through 4 placed below the notes. Dynamic markings such as 'p' (piano) and 'm' (mezzo-forte) are used throughout the piece. The score includes various musical symbols, including rests, slurs, and repeat signs. The piece concludes with a double bar line on the final staff.

EVENING BREEZE

F.M. Noad

The musical score for "Evening Breeze" by F.M. Noad is written for a single melodic line in 4/4 time. The key signature has one sharp (F#), and the piece begins with a treble clef. The notation includes various fingerings (0-4) and articulations (p, m, i) above the notes. The score is organized into ten staves, each containing a series of musical phrases. The first staff starts with a triplet of eighth notes (F#, A, C#) and continues with several measures of eighth and sixteenth notes. The second staff introduces a triplet of eighth notes (F#, A, C#) and continues with similar rhythmic patterns. The third staff features a triplet of eighth notes (F#, A, C#) and continues with similar rhythmic patterns. The fourth staff continues the melodic development with various fingerings and articulations. The fifth staff features a triplet of eighth notes (F#, A, C#) and continues with similar rhythmic patterns. The sixth staff continues the melodic development with various fingerings and articulations. The seventh staff features a triplet of eighth notes (F#, A, C#) and continues with similar rhythmic patterns. The eighth staff continues the melodic development with various fingerings and articulations. The ninth staff features a triplet of eighth notes (F#, A, C#) and continues with similar rhythmic patterns. The tenth staff concludes the piece with a final measure. The score is a single melodic line with no accompaniment.

ETUDE

Ferdinando Carulli (1770-1841)

In this piece the indication "Da Capo" means repeat from the beginning, "al fine" means "to the place marked *fine* or end." When playing Da Capo the other repeats are ignored.

The musical score is written for guitar in 4/4 time, featuring a key signature of one sharp (F#). The piece consists of eight staves of music. The notation includes various guitar-specific elements such as fret numbers (0, 1, 2, 3, 4) and fingerings (1, 2, 3, 4) for both the right and left hands. The right hand is primarily melodic, while the left hand provides harmonic support with chords and single notes. The piece includes several repeat signs and dynamic markings like *p* (piano). The score concludes with a *Fine* marking and a *D.C. al Fine* instruction, indicating a double repeat from the beginning.

MINUET THEME

Wolfgang Amadeus Mozart (1756-1791)

The image displays a musical score for a Minuet Theme, attributed to Wolfgang Amadeus Mozart. The score is written for guitar, featuring five staves of music. The key signature is one flat (B-flat), and the time signature is 3/4. The notation includes various musical symbols such as treble clefs, notes, rests, and bar lines. Fingering numbers (0, 1, 2, 3, 4) are indicated above the notes to guide the player. The score is organized into five systems, each containing a single staff. The first system begins with a treble clef and a key signature of one flat. The second system includes a repeat sign. The third system continues the melody with various note values. The fourth system features a key signature change to two flats (B-flat and E-flat). The fifth system concludes the piece with a double bar line. The overall structure is a single melodic line with accompanying bass notes, typical of a guitar minuet.

The musical score is written for guitar in 3/4 time. It features six staves of music. The notation includes various flamenco techniques such as triplets, piqueado (p m), and rasgueado (p m p m p m). Fingerings are indicated by numbers 0-4. Dynamics like 'p' (piano) and 'm' (mezzo-forte) are marked. The piece concludes with a final cadence marked 'a m i'.

Staff 1: *p i m* 2 1 0 *p m p m* *p m p m p* 0 *p i m* 2 1 0 *p m p m* *p m p m p m*

Staff 2: 2 1 0 *p m p m p m* *p i m p i m p i m* *p m p m p*

Staff 3: *p i m* *p i p p* *p i m* 0 2 1 3 0 2 3 0 2 3

Staff 4: 0 3 0 3 0 2 0 1 2 0 3 1 *p i m* 3 1 0 2 1 0

Staff 5: *p m p m p m* 0 0 0 *p m p p m p m* 0 0 0 2 1 2 1

Staff 6: *p m p* *p m p m* *p m p m p m* *p i m* *a m i* 0 0 1 2

SONG AT NIGHTFALL

C.M. Bellman

The musical score for "Song at Nightfall" by C.M. Bellman is presented in five staves of guitar notation. The music is written in 4/4 time and features a melodic line in the treble clef and a bass line in the bass clef. Fingerings are indicated by numbers 0-4 above or below notes. Dynamics such as *p* (piano) and *i* (acciso) are marked throughout. The score includes various musical notations including slurs, ties, and accidentals.

Staff 1: Treble clef, 4/4 time. Melody: m 1 i 1 i 1 1 4 i p i m 0 i m 1 i 4 m m. Bass: 3 0 2 0 3 0 2 0 2 0 3 0 0 3 2 0. Dynamics: p p p p p p i.

Staff 2: Treble clef, 4/4 time. Melody: m 1 i m i m 0 4 m 1 i m i 0 i p i m i. Bass: 3 0 3 2 2 0 0 0 2 0 3 2 1 2 0 i. Dynamics: p p p p p p i.

Staff 3: Treble clef, 4/4 time. Melody: m 1 i 0 0 m 0 i p i 4 0 1 0 2. Bass: 0 4 2 3 1 2 1 3 1 0 3 3 0. Dynamics: p p p.

Staff 4: Treble clef, 4/4 time. Melody: m i p i 4 2 2 2 2 4 0. Bass: 3 0 2 p 0 0 1 0 0 0 1 0 2 3 0 4 2. Dynamics: p p.

Staff 5: Treble clef, 4/4 time. Melody: 1 4 m m m 1 p p i 0 2 0 m 1 i 1 i 1. Bass: 0 2 3 0 2 0 3 2 3 0 0 3 0 2 3 2 3 0 2 3. Dynamics: p p p p.
