Ex 1/2 - Installation on Windows

1. Run "**Windows - jenkins-2.190.3\jenkins.msi**"
   a. On **"c:\jenkins"** and not on "**C:\Program Files (x86)\Jenkins**"
   b. **Install suggested plugins**
   c. First Admin User:
      i. **Name** (ex ricardo)
      ii. **Password** (same as name - ex ricardo)
      iii. The other is up to you
2. Repair if you have "the" Blank Screen at http://localhost:8080

Ex 2/2 - Meet Jenkins

Create a folder named Test

1. In the dashboard click on **create item**,
2. from there enter **"Test"** at the top of the page
1. and then click **"folder"**
3. and then **"ok"**

Create a user test job that saves it output in a file "user_test.txt"

2. in the folder you created,
3. go to new item on the left,
4. then name the item **user_test** and then click **"freestyle build"**
5. and then "**ok**"
6. In the job configuration page in the build step,
7. click **execute windows batch command,** then in the text box
8. type

   echo "Jenkins working" > user_text.txt

9. then click **save**.
10. Then click **build now** on the left,
11. Then click **workspace** and locate the file,
12. view the contets of the file by clicking view on the page.
